

1 Which of the following statements is correct?

Elastomeric impression materials have a working time of approximately:

- a 1 minute
- b 2 minutes
- c 3 minutes
- d 4 minutes

2 Which of the following statements is correct?

- a The term 'viscosity' describes the flow characteristics of an unset impression material
- b The term 'viscosity' describes the physical appearance of an unset impression material
- c The term 'viscosity' describes the setting rate of an impression material

3 Which of the following statements is correct?:

If kept dry, polyethers have the ability to remain dimensionally stable after setting for:

- a up to 7 days
- b up to 5 days
- c up to 3 days
- d 24 hours

4 Which of the following statements is correct?

Impression materials may be:

- a hydrophilic
- b hydrophobic
- c hydroactive
- d a and b
- e a and c
- f b and c
- g a, b and c
- h none of the above

5 Which of the following statements is not correct?

- a a zero contact angle would indicate complete wetting of the surface
- b a high contact angle would indicate less wetting of the surface
- c a zero contact angle would indicate less wetting of the surface

6 Which of the following statements is correct?

An in-vivo study of impression materials is:

- a simple to accomplish
- b difficult to accomplish because of temperature fluctuation
- c difficult to accomplish because of all the variables eg blood and saliva contamination, deformation during removal etc

7 Which of the following statements is correct?:

The art and science of impression making was first described in:

- a 1924
- b 1874
- c 1824
- d 1755
- e 1722

8 Which of the following statements is correct?

Elastomeric impression materials have a setting time of approximately:

- a 1 minute
- b 2 minutes
- c 3 minutes
- d 4 minutes
- e between 2 and 6 minutes

9 Which of the following statements is correct?:

The two most frequently preferred impression materials are:

- a monovinyl ethers and polyvinyl succinates
- b monovinyl siloxanes and polyethers
- c polyvinyl siloxanes and polyethers

10 Which of the following statements is correct?:

Additional reaction silicones are also known as:

- a polyethers
- b polygels
- c polyvinyl siloxanes
- d polyvinyl silicones

KaVo HealOzone

For gentle caries treatment

Effective, economic, innovative and safe

- No pain
- No drilling
- No side effects or ensuing disorders

Haven't you always wanted to be able to put your patients at ease by offering them the assurances listed above? Now you can.

HealOzone, the new approach to caries treatment, offers you all this and more. Very easy to use. Ideally suited to the treatment of children and phobic patients.

Has a wide range of use.

Scientifically proven effectiveness.

KaVo DIAGNOdent® pen

Find caries wherever it is hiding

The KaVo DIAGNOdent pen is a modern prophylactic:

- Cordless: for ultimate mobility
- Handy: always there, whenever you need it
- Easy to use: and quick
- Precise: for complete caries detection

With the KaVo DIAGNOdent pen, even hidden caries can be detected quickly, easily and reliably - wherever they are.

The DIAGNOdent pen is the perfect tool to completely detect: approximal caries, fissure caries, smooth surface caries (gold standard in this area)
