

CPD QUESTIONNAIRE

3.1.1

Article: Are you treating planned cases or treating teeth to stay busy? Lesage p6

- 1. Which statement is false: According to the author, today's patients:**
 - a Are more astute about dentistry's capabilities
 - b Are more cognizant of the value of an attractive and healthy smile.
 - c View dentistry as a "fix-it-to-relieve-pain" profession
- 2. Which factors need to be evaluated when comprehensively assessing a patient's dental condition:**
 - a Functional
 - b Biological/periodontal
 - c Orofacial aesthetic
 - d None of the above
 - e. All of the above
- 3. Which statement is false: According to the author, when new emergency patients present to the practice:**
 - a Discussing a comprehensive treatment plan should be avoided
 - b Discussing a comprehensive treatment plan is recommended
- 4. Which statement is true: Because a dentist has conducted technically competent and thorough examinations:**
 - a Does not guarantee that patients will accept the treatment that will establish and help maintain their oral health
 - b Will guarantee that patients will accept the treatment that will establish and help maintain their oral health
- 5. According to the author, what is the simplest way to define responsible aesthetic dentistry:**
 - a Patients' needs, combined with their wants, as reflected in a comprehensively planned treatment with preservation of tooth structure in mind
 - b Offering aggressive, expensive or complex procedures
 - c Neither of the above

Article: Clinical digital photography. Part 1: Equipment and basic documentation. Mahn p18

- 6. The first dental journal to be created was:**
 - a The Journal of the American Dental Association
 - b The American Journal of Dental Science
 - c The Journal of American Dental Research
- 7. Which type of camera, according to the author is recommended for clinical use:**
 - a Compact cameras
 - b Interchangeable lens cameras
 - c Reflex cameras
- 8. Which flash light is favoured by inexperienced dental photographers:**
 - a Macro lateral flash light
 - b Ring flash light
 - c Twin flash light
- 9. In the author's experience, which macro lenses provide the ideal combination of magnification ability and convenience working distance for dental purposes:**
 - a 50mm in focal length
 - b 200mm in focal length
 - c 100mm in focal length
- 10. Which statement is correct:**
 - a A good mandibular occlusal photo is far more difficult to take than the maxilla.
 - b A good maxillary occlusal photo is far more difficult to take than the mandible.

CPD QUESTIONNAIRE

3.1.2

Article: What other biomaterial has so many uses: Flowables Terry p42

- 11. Flowable composite resins were developed and introduced to the world in:**
 - a 1986
 - b 1996
 - c 1976
- 12. Which statement is true: compared to the conventional hybrid composite, earlier flowable formulations:**
 - a Demonstrated poor clinical performance with inferior mechanical properties such as flexural strength and wear resistance
 - b Demonstrated good clinical performance with superior mechanical properties such as flexural strength and wear resistance
- 13. The filler content of the earlier flowable formulations were reported to be:**
 - a 60 to 80% less than that of the universal composite materials
 - b 30 to 45% less than that of the universal composite materials
 - c 20 to 25% less than that of the universal composite materials
- 14. What are the three basic requirements that an ideal restorative material should fulfil:**
 - a Function
 - b Esthetics
 - c Biocompatibility
 - d All of the above
 - e None of the above
- 15. Which statement is correct:**
 - a Composite resin does not have hydroxyapatite crystals, enamel rods, and dentinal tubules
 - b Composite resin has hydroxyapatite crystals, enamel rods, and dentinal tubules
 - c Neither of the above

Article: What other biomaterial has so many uses: Flowables Terry p42

- 16. Which statement is incorrect: Controlled polymerization with flowable composites has been suggested to:**
 - a Reduce marginal gap
 - b Reduce marginal integrity
 - c Reduce shrinkage
- 17. Accepted clinical applications for provisional splinting include:**
 - a Fixed orthodontic retainers
 - b Stabilization of traumatically displaced, transplanted and root fractured teeth
 - c Connection of implants to natural teeth
 - d All of the above
 - e None of the above
- 18. Which statement is correct: next generation flowable composites are filled 69% by weight with an average particle size of:**
 - a 200 nm
 - b 100 nm
 - c 50 nm
- 19. According to the author, an inadequate coronal seal can allow saliva to reach the apical region of the tooth in as little time as:**
 - a 20 days
 - b 3 days
 - c 7 days
- 20. Which statement is correct:**
 - a More than 90% of hypersensitive surfaces occur at the cervical region on the buccal and labial aspects of the involved teeth.
 - b Less than 90% of hypersensitive surfaces occur at the cervical region on the buccal and labial aspects of the involved teeth.
